Assembly Instructions

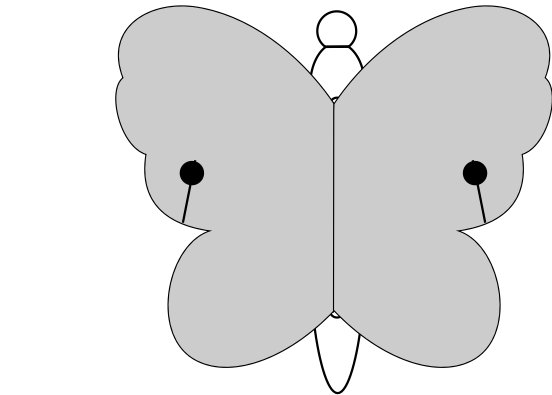

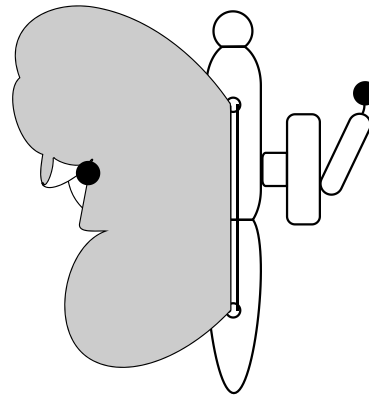

1 Colour the wings and cut them along the outline.
Fold the wing along the center dotted line

2 Turn over the wing. Pull one elastic thread and insert the wing from under the elastic thread.

3 First insert the bead into the slit in the bottom fold and then into the cut on the wing. Smoothen both the layers to lock the bead

4 Repeat the steps and assemble the second wing. Chitte is ready to flap its wings.

... enjoy the flapping butterfly
